

C.5. How important is it to you, that wind energy will generate job growth in RI?

According to ProJo and the US Army Corps of Engineers

TPI manufactures wind turbine blades in Warren, RI

US Army Corps of Engineers®

1. ProJo estimates **500** manufacturing jobs will be created in RI from the Cape Wind project.

2. "Cape Wind will create between **600** and **1,000** new installation and maintenance jobs"

source: US Army Corps of Engineers

* C.5. How important is it to you, that wind energy will generate job growth in RI?

Very Important Important Somewhat Important Not Very Important Not At All Important Need More Information

Narration:

According to the Providence Journal, 500 manufacturing jobs would be created in Rhode Island from the Cape Wind project. In addition to manufacturing jobs, the installation of wind turbines would create hundreds of new jobs in construction, operation and maintenance. Cape Wind would produce 600 to 1,000 new jobs. By this measure, between 300 and 500 jobs would be added in Rhode Island.
